4 of 4 people found the following review helpful. it works like a charm By Toppers Bought this after reading that Magic Eye can be used to relieve computer eye strain. I spend a lot of time looking at screens for work and noticed my long distance vision was getting blurry. Ten minutes of this a day restores my vision to normal, it works like a charm. Who would have known those gimmicky 3D images from the 90's actually have a medical application? I'm a fan. 1 of 1 people found the following review helpful. OUTSTANDING!! I felt that Magic Eye (at a gut level) might be able to help me with Photoreading, and sure enough I was spot on! Even more coincidental, Dr. Paul Scheele endorses this book on the back cover! Who is Dr. Paul Scheele? The person who brought Photoreading to the public's consciousness many years ago! And on top of all of that, Tony Robbins endorses Paul Scheele's work in this Magic Eye book! Mind = Blown! A day or two I handed this book to my mom who haven't seen this in so many years and her reactions were priceless! It sure rekindles a lot of childhood memories! Thanks! 0 of 0 people found the following review helpful. Stunning! By Libi Kavanah This book is awesome! A friend bought it for someone with CP to work on his eyesight. I sent it as a gift to a friend who has a lot of eyestrain with her work. Besides being just incredible to enjoy the amazing pics, it is also helpful for those needing a bit of visual exercise.
