**Danny Orleans : Magic Scratchers** before purchasing it in order to gage whether or not it would be worth my time, and all praised Magic Scratchers:

1 of 1 people found the following review helpful. Unique Puzzle BookBy Allison HoweMy 11-year-old daughter really liked this book. The puzzles are fun, clever and unique. I really enjoyed them myself. It's good to bring on a long car ride or as a little gift.3 of 3 people found the following review helpful. Review from www.firrkids.comBy www.firrkids.comNeed a little wow factor? Introducing the perfect activity book for the car, a rainy day, or just to show your kids you can be a cool parent. This is a small book with a huge effect. The front covers boasts "You won't believe your eyes!" and it doesn't disappoint. Grab yourself a coin and get ready to perform some single handed magic.Each page supplies specific step by step directions. If you carefully follow these, you will be amazed to discover how accurately the book can predict your answers. Are you thinking what the Great Scratchini is thinking? See if he can predict which color crayon you will land on in Rainbow Vision. Try your hand at unveiling which card is hiding under his sleeve in He's Got Your Number. Or give Scratch and Match a try to see if the Great Scratchini will reveal the number you are thinking of.Obviously, there is solid mathematical and scientific reasoning for these "tricks" to work. But instead of figuring out the why behind the magic, I'm just going to enjoy the book and believe in the power of the Great Scratchini. I'm amazed by his knowledge! I'm thinking more kids will love this book as much as I do. They will like the interactive aspect of scratching off (why is it that we all like to do that?) the silver bits to get to see if the correct answer will be revealed. Plus, it's shiny and has cool illustrations. It's the perfect car trip accessory: fun for kids, quiet for parents.3 of 3 people found the following review helpful. Fantastic - Kids (and Adults) Will Love It!By David LoshinThis is a fantastic piece of work - I deliberately left my unscratched copy around for me kids (ages 4-12) to look at and within an hour they were all begging me to be to "do" the tricks in the book. Not only will it provide immediate gratification, it also subtly introduces the art of conjuring to the younger crowd. I have seen Danny Orleans perform a number of times, and he completely engages the audience, and his ability to do so permeates this book as well. I cannot recommend this book enough!

Scratch for magic! Kids won't believe their eyes as they follow the steps on 40 scratchable cards, watch the magic

unfold, and then scratch for the eye-popping reveals! Written by a professional magician, these amazing tricks will keep kids awestruck for hours.

About the Author Danny Orleans, a professional magician, is a former algebra teacher and a graduate of Northwestern University's School of Education. He lives in Chicago. Yancey Labat lives in Oakland, California.
