CD doesn't provide color copiesBy CustomerWhile I am please with the games being a reinforcement of actual taught common core skills, I would have expected the included CD to offer color versions of the game. Otherwise, why not just copy from the book. Having colored games would make them more inviting to the children, and provide a much more polished look. I would still have the option of printing in black and while if ink was a concern, but I wanted color.1 of 1 people found the following review helpful. ... uses this in her math class and the kids enjoy it.By Mary Ann PironeMy sister uses this in her math class and the kids enjoy it.1 of 1 people found the following review helpful. Math CentersBy CustomerIt was just what I needed to make math centers

for my students.

Reinforce key mathematical concepts in fifth grade with these fun and engaging skill-based games! Created to align to College and Career Readiness other state standards, this resource is perfect for reinforcing students' mathematical skills. Perfect for centers, workstations, or family math night, these engaging games that can be played in pairs or small groups, and results can be used for formative assessment. About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

About the Author Ted H. Hull, Ed. D., served in public education for thirty-two years as a mathematics teacher, K 12 mathematics coordinator, school principal, director of curriculum and instruction, and project director for the Charles A. Dana Center at the University of Texas in Austin. While at the University of Texas, he directed the research project "Transforming Schools: Moving from Low-Achieving to High Performing Learning Communities." After retiring, Ted opened LCM: Leadership Coaching Mathematics with his coauthors and colleagues. Ted has coauthored numerous books addressing mathematics improvement and has served as the Regional Director for the National Council of Supervisors of Mathematics (NCSM).
