Steve Ryan : Math Puzzles (New Sit Solve Travel) before purchasing it in order to gage whether or not it would be worth my time, and all praised Math Puzzles (New Sit Solve Travel):

This title features squares, mazes and logics problems. Grab a pencil and give your brain a stretch! These intriguing and varied maths and number puzzles will mystify solvers and make the hours spent travelling speed by. All that's necessary are some basic addition, subtraction, multiplication and division skills...At least at the start. But beware! Some of the many magic squares, mazes, logic problems and matchstick manoeuvres could be deviously lying in wait to trick your thinking, not your maths.

About the AuthorSteve Ryan is recognised as one of the most prolific creators of puzzles in the world, with more than 12,000 brain-busting bafflers to his credit. This virtuoso of vexation has been inventing games and puzzles since childhood.
