**Vivien Lucas : Mathematical Merry-go-round: Whole Class Oral Activities to Enhance the Curriculum** before purchasing it in order to gage whether or not it would be worth my time, and all praised Mathematical Merry-go-round: Whole Class Oral Activities to Enhance the Curriculum:

0 of 0 people found the following review helpful. For grades 6-12By divikaGood ideas for engaging students. This guide would have been better with more colored reprintables. You have to make too many of the activities yourself.

Sixteen varied and well worked out whole class activities form the heart and the purpose of this collection. The aim is to encourage everyone's active participation with the teacher directing from the front. For some of the activities the pupils have to respond verbally, for others they have to hold up coloured cards with the words 'true' or 'false' or the choices 'A', 'B', 'C' or 'D' printed on them. Photocopy masters are provided for each of these cards and also of the various forms and charts needed to respond or react to the the situations being set up. Anyone looking for a way of generating enthusiasm and quick responses will find this book most useful.
