I guess everyone is even doing puzzles electronically now. I like to take a break from the electronics. I can do a word search puzzle and still be aware of what's going on around me and I can stop in the middle of one easily. I like the size of this book, it's easy to take with me. I like the quality of the pages - not the cheap paper that rips when you write on it and you can't see through it. I love the spiral binding as it makes it easier to handle the book - half the book gets tucked out of your way unlike traditional book binding. None of the spiral bound word search products have a picture of their inside pages to see the layout, so I'm posting one. I would find this helpful when selecting a book. This book is not described as a large print book, but the print is pretty large. I wish the grids were larger - more columns rows would be nice and the word list print was a bit smaller. I think a larger grid would be more challenging. Overall, this is a nice book at a great price for 300 puzzles...check the prices at your local store for cheap, poor books with not many puzzles in it. I'll definitely buy a different book of the same style when I complete this one.6 of 6 people found the following review helpful. FUNBy DooneI'm having fun with this little word search book.....the relax factor I receive from doing the searches causes me to give this book 2 thumbs up. Easy to throw in your pocketbook for a doctor or dentist visit, waiting at other appointments or just for lounging at home.0 of 0 people found the following review helpful.
