Padraic Fallon : Vision of MacConglinne: and Other Plays before purchasing it in order to gage whether or not it would be worth my time, and all praised Vision of MacConglinne: and Other Plays:

Three of Padraic Fallon's brilliant radio plays from the 1950s, a time that is now recognized as the medium's golden age are reproduced in this collection. These three plays reveal the range of Fallon's historical and social themes, combining intellectual subtlety with lyrical beauty and moments of broad humor. An introduction from one of Fallon's sons explores the literary context and production history of these genre-defining plays.

'Fallon's meaning deepens each year...His sensibility has weathered in Galway the rainy light that was familiar to both Raftery and Yeats; it has been tutored by a landscape once elemental and historical; a landscape that holds the walled demesne and the tower as well as the bog face and the stone wall.' - Seamus Heaney. 'He possesses a blunt, truth-telling sensibility together with a contrary and tender-hearted lyric perspective. His originality, both of phrase and perspective, remains in my mind' - Eavan Boland

About the Author Padraic Fallon was a poet, radio dramatist, storywriter, and essayist, and the author of *Poems and Poems and Versions*. Brian Fallon was an art critic for *The Irish Times* for 25 years and its literary editor for 11 years. He is the author of six books, including *An Age of Innocence*.
