22 of 23 people found the following review helpful. fun and informative book of cultural lists By Audrey Frances This fun book contains a hundred and one lists organized by number. For example, the chapter known as "Four" includes the following: What are the four voyages of Lemuel Gulliver? What are the four conic sections? What are the four sections of a symphony orchestra? etc. Chapters are: Three, Four, Five, Six, Seven, Eight, Nine, Ten, Eleven, Twelve, Thirteen, Fourteen, Fifteen, Eighteen, Twenty and Twenty-Four. What makes the book more than just a quiz generator is the lengthy explanatory text, anywhere from three to eighteen pages. These pithy essays entertain and inform, and add greatly to the volume's enjoyment. Some questions are really obscure -- what were the five rivers of the classical underworld, anyway? -- but even the easier ones can leave you scratching your head and cursing your memory. Didn't I used to know all this stuff? Then, after you knock yourself on the head and shout "Of course!", you will have the pleasure of reading a well-written essay by a co-author or one of a small number of contributors. There is also a fourteen page suggested reading list, organized by subject, that includes music and URLs. Rounded out with a good index, this is very nicely done and lots of fun. 7 of 7 people found the following review helpful. Fun overview of significant cultural and historical lists. By M. E. Volmar This informative, fascinating and entertaining volume presents, in a question-and-answer format, a compendium of 101 easy-to-memorize lists from the fields of history, mythology, religion, literature, art, music, mathematics and science, which are considered to be of great significance for our culture. Each question is well-organized according to the number of items in its answer, which can vary from three (Who were the 3 Magi, and what gifts did they bring?) to twenty-four (What are the 24 letters of the ancient Greek alphabet?). Each precise answer, instead of giving a mere list, is accompanied by an engrossing essay that places the list in its cultural and historical context and details some well-researched facts about it that aid our understanding of its meaning. As a bonus, for those interested in doing further research in a specific topic, the book offers a list of suggested reading, which includes books as well as Web site addresses. A very thorough index is also offered for those interested in looking for a particular subject. Overall, this is a practical, charming and pleasurable reference to either consult or flip through, recommended for readers of all ages eager to explore our culture's most captivating lists, series and hierarchies. --Reviewed by M. Excellent choice for learned league, quizbowl, or trivia aficionados! Trivia geeks, rejoice!

Can you name... Newton's 3 laws of motion? The 4 horsemen of the Apocalypse? The 5 pillars of Islam? The 6 wives of Henry VIII? The 7 kinds of plane triangles? The 8 Beatitudes? If you're not sure about the answers to the above, this is the book for you. A compendium of 101 culturally significant particulars from the fields of mythology, religion, literature, history, science, mathematics, art, and music, *What Are the 7 Wonders of the World?* is a stimulating fusion of facts and fun that makes for an invaluable reference and an entertaining diversion. Questions are grouped in sections according to the number of items in their answer (all the 3s, all the 4s, all the 5s, etc.), so that the answers are in the form of easily memorized lists. You won't find Luther's 95 theses, or the 266 Popes, for example, but you will find everything from the 3 sons of Adam and Eve all the way up to the 24 letters of the ancient Greek alphabet. This clever format lends itself well to quizzing and guessing, which gives it a deliciously sophisticated parlor-game quality. But for those who wish to delve a little deeper, there are thoughtful essays to go with each answer that include fascinating details and place the list in its larger cultural or historical context. Much more than a book of trivia, *What Are the 7 Wonders of the World?* offers a grand overview of the knowledge needed to appreciate many of the finest things in our cultural and intellectual life.

.com Historic trivia is fascinating stuff. The secret to great trivia reporting is not just in the gathering of the details, however, but in the presentation. Organization is vital, because without an appealing structure, the mind won't grapple with the facts. The human brain needs an inviting presentation to wrap around any new information, and this is what D'Epiro and Pinkowish have done. It's why their compilation of 107 cultural questions is so beguiling. The elemental secret of their innovative table of contents is the use of numbers. Starting with three and working their way up (with a gap here and there) to 24, they pose a series of intriguing questions which are then answered to everyone's satisfaction on the indicated pages. What are the three Laws of Thermodynamics? Who were the three Furies? and What are the three ages of Vico's historical cycle? These are the sorts of queries they present in the chapter entitled Three. Further chapters inquire after the four properties of a musical tone, the six flavors of quarks, the seven Virtues, the 12 Labors of Heracles, the 14 Points of Woodrow Wilson, and the unofficial Homeric titles of the 18 chapters of Ulysses. While the questions are appealing in and of themselves, the answers are even better. Going far beyond mere lists, they delve into the histories and texts, the theories and significance of each. The question is the hook, but the answer is the prize, riveting you with more information than you'd anticipated, reminding you of the joy of learning. --Stephanie Gold A fun read (great for quizzing yourself) and an invaluable resource. Not just for esoteric trivia lovers, this substantial compendium is packed with cultural knowledge--it's all great stuff to know! --Christie Hall Apicella, *Bas Bleu* Do you want to be a genius? Step one is to read this collection. . . This book is a tour de force, one that every home will require . . . to settle domestic squabbles over who's right. --Sandra Murphy, *The Irish News*... highly informative

catalog of 100 of the greatest cultural and historical lists of all time--along with all the background stories. --Book of the Month Club This challenging, yet entertaining book acquaints the reader with vast amounts of information on literature, mythology, religion, art, music, and yes--science. --Newsletter of the National Association of Science Writers A sheer delight.... It is the quality of the writing--the style, the organization, the information included--that makes this book such a pleasure. --The Smoky Mountain News From the Publisher So...you think you're smart. You kept your notes from college. You read the whole newspaper and not just the movie listings. You have subscriptions to the New Yorker and Harper's. You've read all of Shakespeare's plays and did not skim a single line of The Odyssey. You never miss an episode of "Nova." You won the Science Fair...twice. That's just great. But just to prove what we all already know--that you took Alan Turing in a fight in the sandbox and gave Harold Bloom that whole "Canon" idea--try this quiz. If you know the answers, you get to keep your Mensa card. If not...We have just the book for you.
