By Paul This book is a must for any at home family library.

"The most original, most profound, and most humorous collection of recreational logic and math problems ever written." Martin Gardner, *Scientific American*  
"The value of the book lies in the wealth of ingenious puzzles. They afford amusement, vigorous exercise, and instruction." Willard Van Orman Quine, *The New York Times Book Review*  
If you're intrigued by puzzles and paradoxes, these 200 mind-bending logic puzzles, riddles, and diversions will thrill you with challenges to your powers of reason and common sense. Raymond M. Smullyan a celebrated mathematician, logician, magician, and author presents a logical labyrinth of more than 200 increasingly complex problems. The puzzles delve into Gdel's undecidability theorem and other examples of the deepest paradoxes of logic and set theory. Detailed solutions follow each puzzle.

About the Author  
Raymond Smullyan received his PhD from Princeton University and taught at Dartmouth, Princeton, Indiana University, and New York's Lehman College. Best known for his mathematical and creative logic puzzles and games, he was also a concert pianist and a magician. He wrote over a dozen books of logic puzzles and texts on mathematical logic.
