If you are just starting to do them, this is a fine starter, but I recommend Frank's books much higher.0 of 0 people found the following review helpful. Wordoku is very similar to the classic Sudoku, but with letters instead of numbers. Each puzzle has a clue at the top, which might be straightforward or cryptic, to help identify the nine letter word to be placed in each puzzle. The word appears spelt out by one row or column in each puzzle, as shown in the example below. Every word appears in each row, column and 3x3 bold-lined box. Can you work out where all letters must be placed in order to complete the grid? All our puzzle books are printed on very high quality paper, making the puzzle experience even more enjoyable!
