I would not have proceeded much in the game, without the tips and suggestions from this book. Research can take you many different paths, so its good to know what to research first. Also, you need to know the strengths and weaknesses of each alien, so you can match firepower to beat them. With the lobsterman, you can only beat them with the hand to hand weapons, so have some sacrificial soldiers available to do kamikaze attacks on them. Bad thing is that they can lob grenades or use guns also.The book also includes how to manage finances and tips on various battlescape scenarios such as terrorist port, island, synonium site, cruise and cargo ship attacks. And attacking the final city T'leth, which is a 3 part scenario. Expect to loose some soldiers on cruise, cargo, synonium sites and T'leth battlescapes, as they are multi-scenario. Must finish 1st scenario to move into 2nd, with same amount of equipment.The book kinda missed recommendations on what item would make the most money while technicians are sitting idle in the workshops. Also, it does not state what bravery, MC strength settings are good to prevent panic or alien mind control. You would have to experiment to find out the same.0 of 0 people found the following review helpful.
