By A Customer This book is great for the adult who's tired of those magic books that all have the same effects or that make you feel like an idiot when doing them. Paul has put magic into a realm for grown-ups with "Anti-Stress Magic",

"Office Magic", Dinner Magic, and much more. Also included are six of the best card tricks you'll find anywhere. These will even stump any magicians you know. Pictures and easy details make this book enjoyable and beneficial. If you have an interest in more than just "kid's" magic books, then this is one for you! 1 of 12 people found the following review helpful. oh its just the wife .By mr hydeWho would have belived it ,that this diminutive magician from ,the large toadstool in county mayo , could write such a stirring novel, of love, ambition, passion, magic and the american way . Apparently any one from 18 to tablet induced slumber,can perform magic tricks ,that will delight your hells angel neighbors for seconds . After only three days with this book, I was confident to perform magic at MADISON SQUARE GARDENS . I now own a large yacht ,have a very young wife , take regular holidays to the seychelles and am developing gout . I recommend you read this book . I did and hey .

If you have ever wanted to perform magic tricks but thought it was just for kids this book is for you! Paul Daniels, one of England's greatest magicians, shows adults how they can create their own magic and have as much as fun as a kid. Soon you'll be impressing your friends with such classic magic tricks as the mysteriously moving handkerchief and the disappearing pen. Filled with photos and diagrams to help the novice magician, this book makes magic accessible to those who have been reluctant to try it previously.
